

RECYCLING AND DISPOSAL OF ROQUET HYDRAULIC PARTS AND THEIR DERIVATIVE PRODUCTS

We kindly ask you to dispose our hydraulic products in an ecological manner, discarding waste properly and not throwing it into the environment, according applicable legislation in your country/region.

Disposal of packaging and plastic caps (at the beginning of the product's life):

All packaging materials and auxiliar packaging materials in the set are recyclable and must be disposed properly.

- Dispose the wood components of the packaging (as: pallets, boxes, etc..) at a recycling point or at the appropriate waste disposal company.
- Recycle the cardboard and paper packaging components by handing them at a paper recycling point or the appropriate waste disposal company.
- Recycle the plastic components by handing them at a plastic recycling point or the appropriate waste disposal company.

Collect and disposal of hydraulic oil:

Be sure that the hydraulic part is empty before disassembling it and /or take the necessary and enough safety measures to be sure that no contamination is leaked to the environment.

Be careful with the ecological disposal of used oil. Follow the disposal instructions of the communal waste dispose companies.

Part disposal:

At the end of the product life, disassemble it into its constituents, separating them by the materials: plastics, ferrous and metallic materials, electric and electronic components.

- **Plastics:** Recycle the plastic parts by delivering them at a plastic recycling point or the appropriate waste disposal company according applicable legislation.
- **Ferrous and metallic parts:** Separate the metals by considering (ferrous material, aluminum, bronze, etc.) and deliver them separately at an ecological recycling point or the corresponding waste disposal company according applicable legislation.
- **Electric and Electronic components:** If the device contains electrical and / or electronic components, these must be treated separately and be carried out at an ecological recycling point or the corresponding waste disposal company according applicable legislation.
